

ST-500 Cleaning & Calibration Combination Kit

P/N: 57013

The ST-500 Cleaning and Calibration Kit is a convenient all-in-one bundle that allows users to wirelessly connect to their ST-500 PTSA Sensor and conduct our digital cleaning & calibration procedures, with all the necessary solutions & tools.

The kit includes our latest MA-WB Bluetooth® Adapter, Sensor Cleaning Solution & Tools, and a bottle of PTSA 100ppb Calibration Solution. The MA-WB device quickly connects between the sensor and controller, immediately enabling wireless connection via Bluetooth® & the uPyxis® mobile app.

Once connected, the uPyxis® app offers a Sensor Diagnostics Feature that determines the cleanliness of your probe. Learn how to use this valuable tool to rapidly diagnose, clean and calibrate your ST-500 by following the Sensor Cleaning & Calibration instruction details in the YouTube link below:
