

ST-765SS-PAA

Inline Peracetic Acid + pH Sensor for Cooling, Process & Drinking Applications

Description

The Pyxis ST-765SS-PAA is a stainless-steel multi-parameter membrane-less sensor based on unique electrochemical principles to determine Peracetic Acid (PAA) plus pH and temperature of water. This sensor incorporates Pyxis' advanced technology in the field of bare-gold electrochemical detection. The ST-765SS-PAA can simultaneously compensate for temperature and pH in the measurement of PAA based on real-time conditions present in the application of use. This unique internal compensation results in a highly accurate PAA measurement as high as a pH of 9.0+. This sensor should be utilized in conjunction with the FR-300-PLUS auto brushing flow reservoir for a wide range of applications from clean to very dirty.

The ST-765SS-PAA sensor offers a replaceable, front loading reference dual gold electrode head assembly (EH-765-01) that has been independently developed by Pyxis Lab eliminating the shortcomings associated with membranes and gel replacement while offering reduced polarization time on startup with an electrode life span potential of up to 2-years. The flat front-end design of the ST-765SS-PAA makes this platform less prone to contamination or fouling and is easy to clean. The ST-765S-PAA sensor body is composed of 304 stainless steel and is well suited for aggressive environments.

The ST-765SS-PAA sensor offers 2x 4-20mA and RS-485 Modbus outputs and is Bluetooth 5.0 enabled when used in conjunction with the MA-CR Bluetooth Adapter or PowerPACK Series Adapters. This four-electrode composite sensor provides three measured parameters including PAA, pH and temperature with one sensor equipped with fully integrated 2x 4-20mA and RS-485 Modbus outputs.

uPyxis Mobile & Desktop APPS for Wireless Setup, Diagnostics & Calibration

The uPyxis APP manages all Pyxis portable meter and inline sensors on mobile and desktop devices, including Apple iPhones and Samsung Android smartphones. When connected to the Pyxis ST-765SS Series inline sensors, the uPyxis APP enables users to conduct a wireless probe calibration of pH and oxidizer from the touch of their smart device. The uPyxis direct calibration of the sensor eliminates unnecessary time wasted with calibrating the probe through the receiving controller and ensures the highest degree of accuracy and minimizes time spent in the field.

Note The uPyxis Mobile APP is evolving rapidly and users can find the latest version at no cost on Apple iStore or Google Play. The uPyxis Desktop APP may be downloaded at <https://pyxis-lab.com/support-2/>

For wireless access to all Pyxis devices via uPyxis, users will require the inline Bluetooth Adapter (P/N: MA-CR). Details can be found in the Order Information section of this Data Sheet.
